## Overruling the Negro Vote.

[From the Missouri Republican.]

An erroneous statement of the ne-  
gro vote in ten of the Northern States  
purporting to come from the New  
York Globe, a paper owned and pub-  
lished by a colored man, is finding  
wide circulation. The aggregate  
vote is set down at 955,813. As  
shown by the census of 1880, the ten  
Northern States named had made ne-  
groes over the age of twenty-one sit  
as follows:

Connecticut	3,522
Illinois	13,686
Indiana	10,739
Kansas	10,765
Massachusetts	5,956
Michigan	6,130
New Jersey	10,670
Ohio	21,793
Pennsylvania	23,892
New York	20,039
Total	127,125

In at least seven of these States the  
negroes hold the fate of the Republi-  
can party in their hands. In only  
Kansas, Massachusetts, and Michigan  
is the Republican majority such as to  
enable that party to let the negroes  
go. Without the colored vote they  
have scarcely a fighting chance in  
several of these States, and yet not  
one of the ten has sent a negro dele-  
gate to the Chicago Convention. In  
not one of the ten is there a negro in  
a desirable elective office. The great  
force will not permit the blacks  
to have even a nibble at the public  
erik. There is, however, one  
thing the colored voters may count  
on: They will be remembered in  
the platforms. Gen. Limber himself  
could not promise more with less in-  
tention of performing anything.

## Women Sent to Marry Convicts.

A party of fifty women left Borden-  
burg for New Orleans a short  
time ago under peculiar circum-  
stances. They were women sen-  
tenced to long terms of imprisonment  
for grave offenses, and were elected  
to go to the French penal colony,  
where they will find husbands in the  
convicts of the first-class—that is,  
those convicts who have by their  
good behavior entitled themselves to  
a government grant of land and ob-  
tained permission to marry. The wo-  
men were selected from the various  
prisons, and are described as being  
young and good-looking. On arrival  
they will be housed in a religious  
establishment managed by a com-  
munity of sisters, where bachelor  
convicts of the privileged class will  
be permitted to visit them, and as  
soon as a marriage is arranged, the  
colonial government will provide the  
female with a trousseau and set the  
couple up in housekeeping in a small  
way. This system of convict mar-  
riages was devised by Prince Napo-  
leon, and it is said to have produced  
excellent results.—Paris Morning  
News.

## Proverbs Modernized.

Philadelphia, Cal.  
An fernix-ture, or succession of  
different things is the emblem of  
existence.  
Shortness of duration of contrac-  
tion into a few words is the animat-  
ing or essential part of humor.  
All that enters a soft scintillating  
light is not a precious metal remark-  
able for its ductility and malleabili-  
ty.  
Pleasurable anticipation postponed  
market the source of life and moti-  
on of the organization seriously in-  
dispensed.  
Dripshes with long handles that  
have existed but a brief period re-  
move loose dirt in a manner entirely  
free from dilemma.  
All manual labor and no exercise  
for amusement is the cause or agent  
which enforces John to be a youth of  
slow understanding.  
If eager desires or longings were  
hoofed quadrupeds, those who make  
it their business to ask him might go  
about supported in motion.  
To deviate from the true direction  
however slightly possesses as many  
desirable qualities as a certain dis-  
tance, equivalent to 329 rails.  
A single pass of a small steel in-  
strument, promptly and expeditiously  
executed, saves the number follow-  
ing eight and preceding ten.

## Effects of The Wheat Decline.

The drop in the price of wheat,  
which in the past four months has  
amounted to about thirty per cent.,  
is beginning, says the Philadelphia  
Times, to manifest its effects in the  
increased number of business fail-  
tures in the West and Southwest.  
The suspensions during the past  
week were 195 in number, against 143  
for the previous week and 163, 111  
and 98 for the corresponding weeks  
of 1883, 1882 and 1881. In this list  
are included six banking companies,  
whose officers were indulging in a  
greater or less degree in the danger-  
ous practice of speculating in op-  
tions.

While it is true that other causes  
beside the shrinkage in the price of  
wheat have operated to a limit ex-  
tent in producing this long list of  
failures, it is evident that the most  
of them can be attributed to this  
cause. A shrinkage of forty cents a  
bushel in this great staple since last  
December is sufficient in itself to ac-

count for a great loss in values in  
these localities where wheat is the  
chief source of wealth.

The farmers may as well prepare  
for low prices during the coming  
year unless some unforeseen disaster  
befalls the coming crop. The for-  
eign markets appear to be well sup-  
plied. The surplus on hand is large  
and the new crop promises to be  
good. This need not be portentous  
of disaster to the business interests  
of the country, if both farmers and  
traders look the fact squarely in the  
face; and prepare in time to cut the  
business garment according to the  
cloth. The trouble in such cases  
usually arises from anticipating too  
much and mortgaging the future  
on the strength of such anticipa-  
tions.

## Watermelon Culture.

Having had some experience and  
success with this crop, I will give  
you my renders my mode of preparing  
the land and cultivating, although it  
may not be the best. A deep sandy  
loam is the best, the richer the better.  
Lay off rows twelve feet apart, and  
plough out as you would in plough  
in oats. For this work use a turn-  
ing plough. Make hills on top of  
the bed twenty-five feet apart. Make  
first hill on first row twelve feet from  
the end; the second row make first  
hill twenty-five feet from the end.  
In this way the hills will not strike  
opposite each other. Chop the earth  
up well around each hill at least four  
feet in diameter; dig out a hole in  
centre ten inches or one foot deep  
that will hold about one bushel; fill  
this with cow-pen or stable manure,  
well rotted, that has been protected  
from rain and sun; chop this up and  
thoroughly incorporate it with the  
soil, making a slight elevation, not  
more than two or three inches. Plant  
the seed not more than one and a half  
inches deep (and I prefer to stick  
the sharp end of every seed down), put-  
ting from eight to twelve seeds to  
each hill. As soon as they are well  
up, scratch around the young plants,  
and thin out to four plants; as soon  
as they have four or five leaves each,  
thin out leaving two plants to each  
hill. Keep the hill clear of grass and  
weeds with the hoe. Run around  
with a sweep four or six times to  
the row, and plough off from the  
vines as they run; never turn the  
vines back to work under them; the  
vines cannot be moved with so much  
care that it will not injure them.  
The best time for planting is from  
the tenth to the twentieth of April.  
I have pursued this plan for a num-  
ber of years, and have never made a  
failure, generally growing melons  
that will weigh from fifty to fifty  
pounds, and not infrequently as high  
as sixty pounds.—J. K. Mosby, Lan-  
derdale, Miss.

## HE SIGNED FOR HIS SIRE.

Some few years since a melodrama  
was played in a certain theater, the chief  
actor in which had made himself, from  
his haughty and overbearing conduct,  
disliked by one and all. In the last act  
he was supposed to visit the tombs of  
his ancestors. In the center of the  
stage, upon a marble pedestal, stood  
the statue of his father. A heavy fold  
of drapery covered the figure. Enter  
Albert. "Once again," he says, "to  
gaze upon those features which in life  
so often gazed on me with tenderest af-  
fection! Father, thy mourning son now  
comes to pay thee adoration. Let me  
remove the veil which from the vulgar  
gaze shields the beloved image of a nee-  
door parent." Off went the drapery,  
and behold! the father stood upon his  
head. The shouts of laughter that sal-  
uted this practical joke put an end to  
the scene, which changed to the next  
as quickly as possible, amid the bravos  
of the audience, the anger of the manager  
and the uncontrollable rage of the actor.

## DOMESTIC ECONOMY.

**PICKLED RAISINS.**—Leave two pounds  
of large, fine raisins on the stems, add  
one pint of vinegar and half a pound of  
sugar; simmer over a slow fire half an  
hour.

**BUTTER.**—Take a new flower pot,  
wash it clean, wrap in a wet cloth and  
set over butter, will keep it as hard as if  
set on ice. Milk, if put into an earthen  
can, or in a tin one, will keep for a long  
time, if well wrapped in a wet cloth.

**APPLE JELLY.**—Pare and stew some  
juicy apples (greenings are nice) in  
enough water to cover them, strain as  
directed for currant jelly, allow a pound  
of sugar for each pound of juice, put  
them together and strain, boil four or five  
minutes, skimming it thoroughly.

**PARTISANS.**—Take three young par-  
tridges, place them on a spit before the  
fire, and roast them fifteen to twenty  
minutes; send them to table with bread  
crumbs browned in the oven, with a  
small piece of butter added round them,  
and send in a tureen some rich brown  
gravy.

**TOMATOES.**—To keep ripe tomatoes all  
winter, select fine sound tomatoes; wipe  
them perfectly dry and place them very  
carefully in a stone jar two-thirds full.  
Fill the jar quite up with good hard and  
cover closely. When wanted for use,  
take them out from under the lid and  
wash them in hot water.

**BAKED BEETS.**—These excellent veg-  
etables are quite as good baked as  
boiled, and the sugar is better developed  
by the baking process. The oven  
should not be too hot, and the beets  
must be frequently turned. Do not  
peel them until they are cooked, then  
serve with butter, pepper and salt.

**BANANA AND APPLE TART.**—Make  
crust of fine flour and fresh butter.  
Make little crust, but make it good.  
Slice apples fine, and put in dish with  
three or four bananas sliced, only add-  
ing sugar and perhaps a little sirup, if  
you have got it. Cover crust over fruit;  
brush a little melted butter over top;  
strew white sugar on, and bake twenty  
minutes or more, as required.

**CANNED PEACHES.**—When canning  
peaches one cannot guess at just the  
number of halves or quarters needed to  
fill the can, and so often after filling  
the can several pieces are left in the  
sirup; and if you add others and cook them  
over again they will drop in pieces. My  
way to avoid this is to take out the  
pieces carefully on a plate, cook the others,  
and, when they are needed to help  
fill another can, drop them for a minute  
or two into the sirup.

## AN OFF-HAND WAY TO MEASURE AN ACRE.

Few farmers know the size of their  
fields or how many acres they contain.  
A field of the writer's, before it came  
into his possession, had been plowed  
and reaped by contract for fifteen acres.  
On measuring it was found to have but  
twelve acres. It is desirable, in fact  
indispensable for good work, that a  
farmer should know how many acres  
each field contains, for otherwise he  
cannot apportion seed or manure for it,  
nor can he tell how much time it would  
require to be plowed. A measuring  
cord should be part of the furniture on  
every farm. To make one, procure sev-  
enty-seven feet of strong rope, one inch  
around; make a loop or fasten a ring or  
bar at each end, and make these pre-  
cisely sixty-six feet apart. This is four  
rods. Then tie a piece of red rag in  
the center. One acre of ground will be  
a piece four of the cords (chains) long  
and two and one half wide, equal to six-  
teen by ten rods, making 160 square  
rods to one acre. The advantage of the  
ring or loop is that one person can  
measure alone by driving a stake in the  
ground to hold the rope while he  
stretches it out. The rope should be  
soaked in tar and dried, which will pre-  
vent it from shrinking when wet.

PLEASURE may be aptly compared to  
many very great books, which increase  
in real value in the proportion they are  
abridged.

## THE MODERN PRINTER.

This Man is at the Desk. He is an  
Editor. What is that in his hand? It  
is a Microscope. What does the Editor  
want of a Microscope? He is looking  
for his salary.

See the Elevator. It is not running.  
How the Man swears. He is an Editor.  
Do Elevators ever run? Oh, yes, when  
they are first put in a Building, and be-  
fore they are Paid for.

This is the Man who has had a Notice  
in the Paper. How Proud he is. He is  
Sleeping Higher than a Blind Horse.  
If he had Wings he would Fly. Next  
week the Paper will say the Man is a  
Meady Old Fraud, and the Man will not  
Stop so High.

Here is a Valise. It does not Weigh  
Four Hundred Pounds. It is the Valise  
of an Editor. In the Valise are Three  
Socks and a Bottle and a Book. There  
is Something in the Bottle. Maybe it is  
Arnie for the Editor's Sore Finger.  
The Book is Baxter's Saints' Rest. The  
Socks got into the Valise by Mistake.  
Perhaps the Bottle will get into the Ed-  
itor by Mistake.

Bernold the Printer. He is Hunting  
for a Pickup of half a Line. He has  
been hunting for Two Hours. He could  
have Set the half Line in Twenty Sec-  
onds, but it is a Matter of Principle with  
him never to Set what he can pick up.  
The Printer has a Hard time. He has  
to Set type all night and Play pedro for  
the Beer all Day. We would Like to  
Be a Printer were it not for the Night  
Work.

Is this a Corner Lot? No, it is a  
Towel. It has been serving an Appren-  
ticeship in a Printing Office for the Past  
four Years. The horses are Dragging it  
away. A man will Take an Ax and  
Break the Towel into Pieces and Boil it  
for Soap Grease. Then he will sell the  
Towel for Tripe. If you Find a Piece of  
Tripe with a Monogram in one Corner,  
you may Know it is the Towel.

Has the Printer Tobacco? He has,  
But he will not Tell you So. He carries  
it in the Leg of his Boot, and when he  
wants a Chew he Sneaks down in the  
Back Alley where Nobody can See him.  
When he Spits tobacco it sounds like a  
Duck diving in the Water. The printer  
is a Queer man. He is a Fickle person.  
Sometimes he Has ten thousand Em on  
the String, but they are Always his  
Drapes. If you are a Printer do not be a  
Blacksmith, or you will get Fired.

HERE we Have a Business Manager.  
He is Blowing about the Circulation of  
the Paper. He is Saying the Paper has  
Entered upon an Era of Unprecedented  
Prosperity. In a Minute he will Go up  
Stairs and Hide the Editor for leaving  
his Gas Burning while he Went out for  
a Drink of Water, and he will dock a  
Reporter four Dollars because a Sub-  
scriber has Lied him and he cannot  
Work. Little Children, if we Believed  
Business Managers went to Heaven we  
would Give up our Pew in Church.

HERE we have a Knife. It looks like  
a Saw, but it is a Knife. It belongs to  
an Editor, and is used for Sharpening  
Pencils, killing Roaches, opening Cham-  
pagne Bottles, and cutting the Hearts  
out of Bad men who Come into the  
Office to Whale the Reporters. There is  
Blood on the Blade of the Knife, but  
the Editor will Calmly Lick it off, and  
then the Blade will be as Clean and  
Bright as Ever. The Knife cost 70  
Cents, and was imported from London,  
Connecticut. If you are Good, perhaps  
the Editor will give it to you to Cut off  
the Cat's Tail.

HERE is a Castle. It is the Home of  
an Editor. It has Stained Glass win-  
dows and Mahogany stairways. In front  
of the Castle is a Park. Is it not sweet?  
The lady in the Park is the editor's wife.  
She wears a Costly robe of Velvet  
trimmed with Gold Lace, and there are  
Pearls and Rubies in her Hair. The ed-  
itor sits on the front stoop smoking an  
Havana Cigar. His little Children are  
Playing with diamond Marbles on the  
Tessellated Floor. The editor can afford  
to Live in Style. He gets Seventy-Five  
Dollars a month Wage.

## ANNOUNCEMENT.

We are authorized to announce JONAS BOYD as a Republican candidate for Sheriff of Christian county. Election August 1884.

The Morrison bill was defeated Tuesday.

Mr. Jas. A. Connelly, of Illinois, whose nomination was confirmed as solicitor of the Treasury, declined to accept upon the ground that his law practice would pay him better.

Miracles are being performed in Eastern by Rev. Arthur J. Sloan, a faith doctor. Invalids who have not walked for 20 years are entirely restored to health without the aid of medicine, merely through faith.

Chas. Board, brother of Robt. Ford, the murderer of Jesse James, suicided at Richmond, Mo., last Monday. He was suffering with incurable consumption, and had been in low spirits for several days.

The firm of Ballard & Ballard, proprietors of a large flouring mill in Louisville, made an assignment on the 6th; liabilities \$150,000. The firm started about four years ago and have lost money since its commencement. The Louisville banks are their principal creditors. About 80 per cent. is secured by assets.

The latest project in New York City is the Arendt Railway, which is supposed to add much to rapid business transactions in the metropolitan city. The railroad is to consist of tunneling under Broadway to a sufficient extent to accommodate street railways and pedestrians. Injury to property and the immense cost are raised as serious objections to this great undertaking.

Our merchants say the Louisville exposition never injure them in the least. The bump of state pride is pretty well developed in our people and they are solid for the "big ex."—Madisonville Times.

Our merchants express themselves differently, and many of them refuse to buy goods from Louisville druggists.

A loan of \$1,000,000 has been applied for to Congress to assist in making the Cotton Centennial at New Orleans a success, and the projectors claim that there is no risk. They feel justifiable in making the request upon the plea that Congress granted a loan of \$2,000,000 to the Centennial at Philadelphia in 1876. Of course a loan in this Exposition would naturally extend to other enterprises of like character a similar privilege, and hence the probability is the request will not be granted.

On last Friday night in Madisonville, Ky., burglars entered the houses of Messrs. Ruly, Eades and Morton, but received but little financial encouragement, having secured only \$2.10. Last of all they entered the residence of Mr. Zeno F. Young, editor of the Times, but did not find out their mistake until they were on the inside, and only secured in postal cards, stamps and actual cash about 60 cents. This useless to say they gave up the search just here.

The Cincinnati News Journal was placed in the hands of a receiver on last Monday, in order to properly satisfy the stockholders of the adjustment of some financial matters. The Journal states that no paper can be successfully run by 100 stockholders when each wants it run his way, and further states that the paper will be published as usual, notwithstanding the reports of other papers to the contrary. Mr. Chas. M. Steele, its present business manager, was appointed receiver.

In the report of Mr. Stewart, of Texas, accompanying a bill he has prepared for Congress he says:

"The idea of building a railway from the United States to the Argentine Republic is somewhat startling to those who have never given the subject a thought, and a little reflection will convince anyone that no insuperable obstacle is in the way of such an enterprise. A railroad from some point in Texas or elsewhere in this country where connection is formed with the railway system of the United States to the City of Mexico, and thence through the Republic of Mexico and Central America and along the Isthmus of Darien, passing along the east of the Andes, through South America to the Argentine Republic, would meet with but few natural obstacles in the way of its construction, and the distance will not exceed 6,800 miles, and it may be shortened to 6,000 miles by commencing its construction at the City of Mexico, where it will connect with roads already built and in process of construction. He says that when such a railroad is constructed our commerce will be enlarged to such an extent as at this time to defy anything like a correct estimate of its value, and then we will be in a position to say the European governments in the remarkable words of President Monroe, that we should consider any attempt on their part to extend their system to any portion of the hemisphere as dangerous to our peace and safety. The capital with which the road is to be built and operated must be protected by the pledged faith and proper guarantees of all governments that may be interested in the building and maintenance of the colossal enterprise."

The following will be of interest to the lovers of a good cup of coffee. "According to a published report of Sanitary Superintendent, Day, of the Health Department, recently presented to the Commissioners, embodying the results of an investigation into the dangerous adulterations of green coffee, a careful analysis of the coloring matters used, leads to the conclusion that every cup of coffee made from the colored beans, which are put up on the market as Java, contains one sixteenth of a grain of arsenious acid, which is a virulent poison. Mr. Arnold, President of the Coffee Exchange, in an interview said that while it was perfectly well known that coffee was colored and polished for the purpose of making it more saleable and possibly for purposes of deception the general belief in the coffee trade was that no deleterious ingredients were used in the process. Some of the small retail dealers do not know the difference between pure and adulterated coffee themselves, but the best grocers are deceiving their customers."

## FROM THREE TO FIVE DOLLARS

Is what you can save. Why not save it? Money does not grow on trees, neither is it found in the streets. It takes hard work to make money. Be guided in your purchases by good judgment and not by glittering side issues. Why pay some one \$15 for a suit, when the very same suit can be bought from us for \$3 less? Why pay \$18 and \$20 for suits, the like of which we sell for \$14 and \$15. Don't you think your good judgement would tell you that you should trade with us? We stand back for no one. We sell better goods for a lower price and sell them on their merits.

He remained in that city until a short time ago when he became prostrated with consumption and was brought back to this city a few days since. He has been rapidly sinking for a week or more, and last Tuesday his sufferings were ended. His funeral was preached by Rev. J. T. Barrow, of the Baptist church, and the remains were entered in the city cemetery Wednesday morning.

This has fallen a promising young man in the morning of life. May he rest in peace is our earnest wish.

His latest now is an exhibition of 4 days, commencing May 20th, of a large line of household draperies, banners, screens and a variety of fancy articles, executed on silk, satin, plush, felt, lace, etc., with chenille, tulle, embroidery silks and braids. Showing embroidery and applique braiding in a great variety of designs, ranging from the costliest to the least expensive, covering a large line of decorative work, which we know the ladies will all appreciate. Mr. West says the value of the articles that he will have on exhibition will be near \$5000, and some of this delicate work was executed on the Domestic sewing machine by a totally blind girl at the Domestic office in Cincinnati. The Domestic Company has liberally seconded Mr. West's enterprise by furnishing him experts to do this same work and to explain to the ladies how it is done. He also expects to have the services of two ladies, if they get through with the exhibition at Louisville in time to get here. Embroidery is now very fashionable, but heretofore was almost exclusively the work of the hand, making it very expensive, but Mr. West says that any lady can now do the very nicest embroidery of almost any figure or design in a very little while on the Domestic machine that it used to take weeks to do by hand, and just once seeing will be all the instructions they will need, as it is all very simple and easy done. He invites everybody.

## Our County History.

The field work on our County History is about complete, and the book will go to press in a few weeks, and will be ready for delivery sometime during the summer. The gentlemen who have been engaged upon its preparation for several months past, have left for other fields—some of them are now engaged on Todd county, and some of them upon Trigg—preparing similar volumes to Christian, Col. Perrin, the general manager, left for his home in Louisville a few days ago, for a little rest and recreation, while his force under Messrs. Battle and Knowles in Todd and under Messrs. Berry and Ford in Trigg, push on the history of those counties.

## A Grand Reunion of Relatives.

Mr. W. W. Radford informs us that on Friday the 23 of May at the River bridge, on the L. & N. there will be a grand picnic and meeting of the relatives of the Killbrees, Johnsons, Radfords, Garrets, Lesters, Farris, Brownings, Metcalfe, Greys, and a great many others. Col. Hon. C. of Clarksville, Col. Killbree, of Nashville, and several other distinguished gentlemen will address the people on that occasion. They have not fully decided but think the meeting will be at Guthrie, as it will be the most convenient place for all to reach. Mr. V. M. Metcalfe will be at home in a few days, and will make all arrangements for the occasion, as he has seen and written to most of the parties.

## Horse Thief Arrested.

On last Monday night a man giving his name as Thompson, and representing himself to be a drummer from Baltimore came to this city from Clarksville, Tenn., and put up his horse and buggy at Means & Well's stable. On Tuesday morning he said he wanted to sell the horse and buggy. Mr. Means examined the horse and found it worth \$100, the price asked which he promptly paid. News soon reached Mr. Means from Clarksville that the horse and buggy belonged to Caldwell & Shelton, of that city, and he at once proceeded to overtake the thief. Mr. Means soon got on track of Thompson and captured him at Penbrooke, recovering all except \$19 of the \$100 he had paid him for the horse. He was brought to this city and lodged in jail, to await a call from the authorities of Tennessee.

Our band has secured the services of Prof. Sevey, who will remain here three months and instruct its members. Prof. Sevey is a gentleman of long experience and will no doubt be of great benefit to our band. We have a good band and by a little encouragement on the part of our citizens it can be made still better. The young men who represent this band are well worthy of recognition by the people of Hopkinsville, and we hope they will meet with the cooperation of all, for a city the size of ours cannot afford to be without a good band.

Tuesday afternoon a fistfight took place on Main street between Colburn and Clark, two stone cutters. From what we can learn it seems that their bad blood was aroused in a dispute about a bill, when the blow was given, which caused the parties to attempt to pummel each other. With the exception of the loss of a little blood no damage was done. The belligerents were promptly cared for by officers Wadlington and Riggs.

Joe Orr, Jr., in attempting to descend from the top of a freight car last Monday evening, at 6 o'clock, missed his footing and fell to the ground, striking his face against the rail, entailing an ugly gash on his face and forehead. He was conveyed to the home of his parents and medical aid summoned. The wound is not a dangerous one.

Messrs. Wilson & Galbreath will have their handsome ice cream parlor in full blast to-night.

Renew your subscription before your time expires, as the paper will be stopped when your time is out.

## NOTICE TO FARMERS.

A farmer who gave an order for a Binder, informed us that the reason why he did not order a Champion although he preferred the Champion and knew it to be the best, was that he was persuaded by the one who took orders that we would not keep repairs, and that the Champion would not be sold here next year, &c. This kind of talk is calculated to injure the sale of the Champion and made me an offer to help sell their own machine. This is not fair competition and is untrue in every particular. We desire to say right here that we will keep all the necessary repairs for the Champion machine. That if any one who buys a machine from us and fails to get repairs if wanted during harvest or any other time, we will pay for such lost time. We have gone into this business to stay, so help us.
